

Bluewave Spa Stereo System

PLAY HOT TUB MUSIC FROM YOUR SMARTPHONE

OUR NEW BLUEWAVE™ SPA STEREO SYSTEM CONNECTS VIA BLUETOOTH®

Now you can listen to YOUR music from your smartphone and get premium sound through the speakers in your Jacuzzi® hot tub. If you store your music or save your favourite radio stations on a smartphone, the new BLUEWAVE Spa Stereo System with Bluetooth® is the innovation you've been waiting for.

We've made it really easy to love this new system. BLUEWAVE integrates with the Jacuzzi's J-1000™ Control System. It displays track and playlist info on the topside control screen, and you can also use the water-resistant remote control – in the J-400™ Collection hot tubs, the remote controls the temperature, lights and jets, as well.

Here are some other reasons why the BLUEWAVE is the talk of the industry:

- It streams audio from up to 30 ft.
- USB power allows you to direct-connect and charge while you listen.
- Docking compartment features a marine-rated seal to keep moisture out.
- AUX input lets you plug in from other devices.
- J-400 hot tubs have JBL® speakers plus subwoofer; J-300™ Collection features marine-grade speakers and subwoofer; and J-200™ hot tubs include marine-grade speakers.
- Apple USB cable is included.

BLUEWAVE gives you the ability to personalize your hot tub experience like never before. Tap into your party playlist, stream the relaxing sounds of nature, listen to your favourite sports announcer or tune in to a talk radio show. A new Jacuzzi hot tub with BLUEWAVE sounds amazing, right? (Ask your local Jacuzzi Hot Tubs dealer about retrofitting your existing Jacuzzi hot tub with a BLUEWAVE Spa Stereo System, too.)
